

Giacigli | CATS BEDS

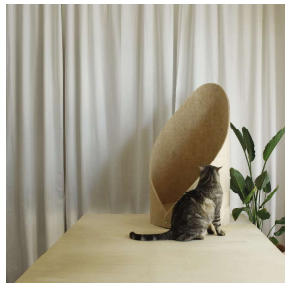

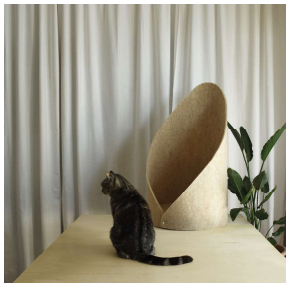

Hemp fiber indoor dwellings for pets that create an area of acoustic and thermal insulation around the guest.

Soft or rough surfaces, made of 90% natural materials, family smells, almost as ours are for them, plant fibers under their fingertips: using Giacigli is like running through the woods, sharpening the nails on the bark, finding the soft belly of those who loved them for the first time.

Two types of Giacigli have been designed based on the more or less sociable character of the cat they are to host.

Giacigli are composed of only three elements, joined together without the use of glues, nor the need for seams.

The ease with which they can be assembled and disassembled and their lightness make it easy to store them if they are not used in the summer.

MATERIALS: hemp fiber, natural wood

DIMENSION: ø55 x H 78/90 cm

PRODUCTION TYPE: handcrafted in Italy
